# 公司简介

## COMPANY INTRODUCE

Lumix3D is a high-tech enterprise focused on providing customers with creative display and intelligent display technology solutions. The company is dedicated to the research, production, manufacturing, and installation of various LED products, including conventional LED displays, transparent LED screens, LED film screens, LED optoelectronic glass displays, small-pitch LED displays, and customized LED display screens, offering customers a one-stop LED display solution.

Lumix3D upholds its core values of "Integrity, Gratitude, Respect, Cooperation, and Innovation," striving to become a trusted partner for clients in the global LED industry.

# 企业文化

## COMPANY CULTURE

people oriented

The company has a complete system for research and development, manufacturing, sales, and service, dedicated to serving professional channel clients and end users both domestically and internationally. It provides high-quality, high-performance LED application products along with professional solutions. The company currently has a team of experts and senior engineers with over ten years of R&D and production experience, as well as a group of highly qualified and dedicated employees.

Product overview

# 产品介绍

## Product Introduction

### Conventional LED display

#### Outdoor LED advertising screen

Supports various installation methods such as wall-mounted, table-mounted, and hanging, to meet the needs of different application scenarios

#### Indoor LED display screen

Indoor displays suitable for various scenarios, supporting multiple installation methods such as wall-mounted, table-mounted, and hanging, to meet the needs of different application scenarios

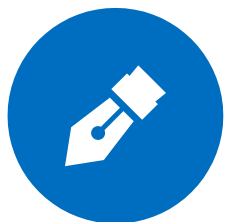

#### LED window display screen

A product display screen suitable for various supermarkets and window displays, supporting multiple installation methods such as table-mounted and hanging, to meet the application needs of different window display scenarios

# 产品介绍

## Product Introduction

### Small Pitch LED Display Screen

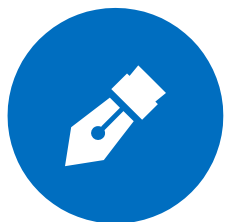

#### Small Pitch LED

P1.25-P1.875 small pitch indoor high-definition display screens are suitable for various scenarios that require high-definition displays, such as command centers and meetings.

#### COB Package

Using COB packaging technology, the ultra-high-definition display with a pixel pitch of 0.4-0.9 features a surface coated with polymer material, providing stunning ink color consistency and an incredibly deep, pure black reminiscent of space, elevating image expressiveness to unprecedented heights

### Creative Smart LED Screen

#### Flexible LED Display Screen

By applying flexible circuit board technology, the module can be bent at any curvature to display various curved shapes

#### Spherical LED Display Screen

In conjunction with scenarios such as technology exhibition halls, various spherical display screens of different radii and sizes can be presented.

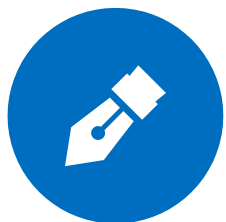

#### Custom LED Display Screen

Based on the specific needs of the client at the site, we can create a corresponding design to customize an LED display screen suitable for the scenario

# 产品介绍

## Product Introduction

### Media Stage LED Screen

#### Outdoor Stage LED Display Screen

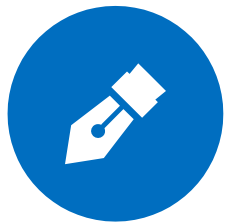

According to the stage design, the LED display screen background can be quickly assembled, making it more efficient and convenient

#### Indoor Stage LED Display Screen

Based on the specific needs of the client at the site, we can create a corresponding design to customize an LED display screen suitable for stage use

## Transparent LED Display Screen

### LED Window Display Screen

Applied to commercial display window glass, it can both showcase advertising effects and maintain transparency without obstructing the window

### LED Strip Display Screen

Suitable for the exterior facades of modern buildings, it features high brightness, clear display, and does not obstruct the overall image of the building itself

### LED Film Display Screen

Suitable for the exterior of modern building glass curtain walls, it can display videos to achieve promotional effects without affecting the overall lighting and integrity of the building's glass facade.
